Rubric version: INAV-VALIDATION-2026-06-04 / generated May 25, 2026

Demand signal

6.2/10

24% WEIGHT

- The SBA frames finance, operations, marketing, and management as recurring small-business responsibilities.
- Target buyer: Solo consultant running webinars for lead generation

Problem severity

7/10

- The SBA frames finance, operations, marketing, and management as recurring small-business responsibilities.

Willingness to pay

6.8/10

- Run one webinar follow-up manually for a consultant and compare reply rate to the previous generic sequence.

Competitive saturation

7/10

18% WEIGHT

- Existing-product check has no named direct match.
- Competitive score rewards a narrow wedge, not absence of research.

Feasibility

7.8/10

16% WEIGHT

- Run one webinar follow-up manually for a consultant and compare reply rate to the previous generic sequence.
- The first version can become too broad if it handles every exception instead of one repeated workflow.

Next validation step

Run one webinar follow-up manually for a consultant and compare reply rate to the previous generic sequence.

Seven days to a build / kill decision.

Derived from this report's own validation test, channels, offers, and kill criteria. Each day has a threshold, so the week ends in a decision instead of a feeling.

DAY 1

Build the buyer list

List 50-100 named solo consultant running webinars for lead generation prospects from Community pain posts and Direct outreach — names, not categories.

Threshold: 50+ named, reachable buyers on the list.

DAY 2

Join the watering holes

Join and observe Reddit / forums, Launch communities, Review and alternative pages. Collect the exact words buyers use for this pain.

Threshold: 10+ verbatim pain quotes captured.

DAY 3

Send first outreach

Send the cold outreach template (below) to 15 buyers from the day-1 list, personalized with one detail each.

Threshold: 15 sent; 3+ replies of any kind.

DAY 4

Run buyer interviews

Hold 15-minute calls using the interview script (below). Listen for current workarounds and what they cost.

Threshold: 3+ completed interviews.

DAY 5

Run the report's validation test

Run one webinar follow-up manually for a consultant and compare reply rate to the previous generic sequence.

Threshold: Problem resonance: 5+ calls or 10+ detailed replies.

DAY 6

Make the smoke offer

Offer "Concierge review or paid template" at \$19-\$99 to every interviewed buyer. Manual delivery is fine — payment is the signal.

Threshold: 1+ pre-commitment (payment, signed LOI, or scheduled paid pilot).

DAY 7

Decide against the kill criteria

Score the week against this report's kill criteria, then take the stated next validation step: Run one webinar follow-up manually for a consultant and compare reply rate to the previous generic sequence.

Threshold: A written build / keep-testing / kill decision.

Pass signal

Pass: thresholds on days 3, 4, and 6 are met — proceed to the next validation step with real buyer language in hand.

Fail signal

Kill or rethink if the week confirms: Fewer than five qualified buyers agree to discuss the workflow after targeted outreach.

Decision scorecard.

The report is structured to force a yes, no, or test decision instead of leaving the reader with a loose brainstorm.

The score turns the report into bottlenecks, accelerators, and a dated first-month launch plan.

Ready to test

Webinar follow-up personalization tool for B2B consultants scores 90/100 for execution readiness. The recommended next step is Run one webinar follow-up manually for a consultant and compare reply rate to the previous generic sequence.

Bottlenecks

- The first version can become too broad if it handles every exception instead of one repeated workflow.
- The buyer may treat the pain as normal admin overhead unless the saved time or reduced risk is measured.
- The product must avoid overclaiming compliance or professional advice in B2B services.
- A broad AI assistant can flatten differentiation unless the wedge is painfully specific.
- The first release can become a generic dashboard if the job is not named tightly.

First milestones

- 2026-06-16: Frame the wedge
- 2026-06-19: Interview 10 people who match the buyer persona.
- 2026-06-23: Ship a clickable demo or concierge workflow that produces the first useful artifact.

BLIND SPOTS

- The first version can become too broad if it handles every exception instead of one repeated workflow.
- A broad AI assistant can flatten differentiation unless the wedge is painfully specific.
- The first release can become a generic dashboard if the job is not named tightly.

HARD QUESTIONS

- Who wakes up already trying to solve this?
- What do they stop paying for or stop doing when this works?
- What proof would make a skeptical buyer trust it in one screen?
- What is the smallest paid version of this idea?

Hi {{firstName}},

I'm researching how solo consultant running webinars for lead generation handle this today: Webinar leads go cold when follow-up messages fail to reference attendance, questions, segment, or promised next steps.

I'm not selling anything yet – I'm testing whether "Webinar follow-up personalization tool for B2B consultants" is worth building, and I'd rather learn from people living the workflow than guess.

Would you trade 15 minutes for first access (and a say in what gets built) if it goes ahead?
